## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 24, 25, drawn to handle/electrical connector structure, classified in class 292, subclass 347.
  - II. Claims 16-23, drawn to a method of assembly, classified in class 29, subclass 854.
  
2. The inventions are distinct, each from the other because of the following reasons: Inventions of Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as set forth, could be assembled using a materially different process.
